

Infection Control Audit — Nephrova Pimpri

Date: 15 September 2026. Auditor: Pooja Shinde. Trigger: two catheter infections in September.

Measure	Result	Target
Hand hygiene compliance	78 percent	90 percent
Catheter care bundle compliance	70 percent	90 percent

Main gaps

Hand rub was often skipped between touching the machine and connecting the catheter.

Sterile caps were reused on two of ten observed connections.

Hand hygiene audits at Pimpri had been done quarterly instead of monthly.

Actions

Retrain all Pimpri nurses and technicians during 17–19 September 2026, and re-audit on 30 September 2026.

The September infection rate at Pimpri is 3.1 per 1,000 catheter days (2 cases in 640 catheter days).
